

39 NORTH EMERGING LEADERS

The 39 North Emerging Leaders group aims to shape the future of the 39N district by supporting the growth of young professionals who are employed by companies within the district. The group focuses on connecting young professionals to each other through social, civic, professional development, and charitable opportunities.

Goals

- ❖ Attract and retain young professional employees in the local ag tech industry by providing opportunities to participate in social, community outreach, and professional development activities.
- ❖ Create a pipeline of future leaders by engaging and developing young professionals within the 39 North district and encouraging their involvement and leadership within the association.
- ❖ Enhance the vitality of the 39 North district by creating a strong community of young professionals.

39 North is an agriculture technology and research district located in St. Louis that comprises the Donald Danforth Plant Science Center, BRDG Park, the Helix Center and Bayer Crop Science. This district has a master plan to put in place financial, human and infrastructure resources to be a leader in agriculture technologies and companies.
